LogiSync Releases Model RXN-4 Ethernet Gateway for LonWorks® based systems

Cleveland, OH: LogiSync LLC, a leading LonWorks® developer since 1993 and provider of embedded hardware and software solutions announced the release of its new, USA made, Model RXN-4 LonWorks® Ethernet Gateway and web server. This customized Ethernet gateway allows a user to access LonWorks® systems via the Internet using a web browser.

Using widely available Ethernet, Internet or modem connections, the LogiSync RXN-4 was built with many standard features including: multilevel security, email alarm notifications, view system and node status, network configuration and management, change node settings and trend data.

Ed Yenni, Founder and President said “The rapid growth of the Internet and the emergence of related standards was the impetus for LogiSync to create this truly novel product. LogiSync’s OEM clients can now cost effectively gain access to their LonWorks® based systems with a private-labeled user web interface without having to incur months of development time and cost. Our off the shelf hardware and base software can be quickly tailored for a specific application getting in customers to market in weeks rather than months or even years.”

LogiSync LLC is an embedded hardware and software solutions provider located in Avon, a western suburb of Cleveland, Ohio. Established in 1993, LogiSync provides its customers with device networking solutions that enable M2M communications for new product designs or to upgrade existing products. LogiSync’s solutions enable sensors, devices, and equipment to be remotely monitored or controlled over existing networks. LogiSync’s time-proven development processes and existing technology benefits customers through drastically reduced time to market and lower risk for introducing new products.

LogiSync’s design services, products, and technology are used by leading OEMs in multiple industries such as, building automation, food service equipment, medical equipment, industrial and process controls, transportation, power and energy, defense and aerospace, and consumer electronics.

Made in the USA—LogiSync products are designed and built in Northeast Ohio.
