LogiSync Launches LonWorks® Gateway Management Tool

Cleveland, OH: LogiSync LLC, a leading LonWorks® developer since 1993 and provider of embedded hardware and software solutions announced the launch of its new, LonWorks® Gateway Management Tool GMT 100. The GMT 100 provides manufacturers with a customized LonWorks gateway configuration and management tool that is suitable for a factory floor environment.

The pre-configured, stand-alone software simplifies the installation, configuration and testing of LonWorks® Power Line communication gateways through a series of simple user screens. The GMT 100 includes both manufacturing and engineering modes to meet varying commissioning and troubleshooting needs for OEM equipment.

Ed Yenni, Founder and President said “Manufacturing environments require intuitive use tools that do not require high levels of networking expertise to use. Prior to availability of the GMT 100, a manufacturer either needed to provide costly engineering support to the factory floor or incur significant cost in writing a customized LonWorks gateway management tool. LogiSync’s GMT 100 responds directly to that market need and will immediately start saving a manufacturer time and money.”

LogiSync LLC is an embedded hardware and software solutions provider located in Avon, a western suburb of Cleveland, Ohio. Established in 1993, LogiSync provides its customers with M2M, and Industrial Internet solutions for new product designs or to upgrade existing products. LogiSync’s solutions enable sensors, devices, and equipment to be remotely monitored or controlled over existing networks. LogiSync’s time-proven development processes and existing technology benefits customers through drastically reduced time to market and lower risk for introducing new products.

LogiSync’s design services, products, and technology are used by leading OEMs in multiple industries such as, building automation, food service equipment, medical equipment, industrial and process controls, transportation, power and energy, defense and aerospace, and consumer electronics.

Made in the USA—LogiSync products are designed and built in Northeast Ohio.
