**FOR IMMEDIATE RELEASE**  
**Wednesday June 18, 2014**

**LogiSync presents at Lorain County Manufacturing Council June 18 meeting**

Elyria, OH: LogiSync LLC, a provider of embedded hardware and software solutions for the Industrial Internet of Things presented their capabilities and participated in a discussion of their latest collaborative product design with local company Stride Tool on the Imperial iManifold. Three local companies worked together to design a new award winning smart HVAC service tool to market in under 12 months.

**The local companies are:**

LogiSync LLC- Avon, Ohio – Ed Yenni - President - <http://www.logisync.com>  
Stride Tool, Inc. – Glenwillow, Ohio – Bill Northrup – President - <http://www.stridetool.com>  
SmartShape Design Corp. – Cleveland, Ohio – Mike Maczuzak - President  
<http://www.smartshapedesign.com>

Ed Yenni, Founder and President said “In today’s rapidly changing environment, it is very difficult for one organization to internally possess all the skills necessary for truly disruptive product development, thus creating the need for effective collaboration models.”

LogiSync LLC is an embedded hardware and software solutions provider located in Avon, a western suburb of Cleveland, Ohio. Established in 1993, LogiSync provides its customers with M2M, Internet of Things, and Industrial Internet solutions for new product designs or to upgrade existing products. LogiSync’s solutions enable sensors, devices, and equipment to be remotely monitored or controlled over existing networks. LogiSync’s time-proven development processes and existing technology benefits customers through drastically reduced time to market and lower risk for introducing new products.

LogiSync’s design services, products, and technology are used by leading OEMs in multiple industries such as, building automation, food service equipment, medical equipment, industrial and process controls, transportation, power and energy, defense and aerospace, and consumer electronics.

Made in the USA—LogiSync products are designed and built in Northeast Ohio.

U.S. Headquarters: 1313 Lear Industrial Parkway Avon, Ohio 44011 United States
